Dear Federal Communications Commission:

As you consider the conditional approval for LightSquared, I write to ask you to preserve the integrity of the nation's GPS system.

Last year, the federal government shut down the Loran navigation system, making recreational mariners solely reliant on GPS for all electronic navigation needs. Like so many other GPS users around the country, GPS is now integrated into our daily outings, and we look to the FCC to protect the integrity of the GPS signal.

Sincerely,

Jason Whitaker

I and thousands of other boaters--recreational and professional are absolutely dependent on the GPS system for safe navigation. Please protect us from the potentially devastating use of the spectrum.

The report to the FCC says it will be harmful. Why is any consideration even being given?

Sincerely,

Ron Tilmon

Dear Federal Communications Commission:

As you consider the conditional approval for LightSquared, I write to ask you to preserve the integrity of the nation's GPS system.

gps is essential to all boaters as well as autos. it will affect even the smallest of occasional fishers. Anything less will compromise finding any locations essential to those who fish for a living or to simply feed thier families. It will affect those who direct cruises, crabbers, shrimpers ect. If this is anything that will affect the gps in autos or telephones then the emergency services could be severely hindered as well as those who just simply have a lack of direction. I feel stongly the gps is important to the vast majority of people.

Sincerely,

Tammy Knight

Like so many other GPS users around the country, GPS is now integrated into our daily outings, and we look to the FCC to protect the integrity of the GPS signal.

While I am well versed in traditional piloting methods and celestial navigation, I have spent many days on the water using GPS as my primary method of navigation. Nothing gives an immediate, accurate position like GPS adding tremendously to the safety of vessels on the water.

Allowing anything to Jeopardize the accuracy of GPS seems just plain foolhardy.

Sincerely,

Paul Gray

Dear Federal Communications Commission:

No, we can't allow yet more cronyism in Government degrade the lives of ordinary citizens who rely on government to protect them from those with excess money and influence.

As you are probably aware, this exact scenario appears to be happening with regard to the recent "fast tracking" of a petition from LightSquared to use cellphone radio bands at a frequency that appears to degrade GPS signals. Please act to disallow this usage, at least until the details of what looks to be special treatment not in the public interest are more fully investigated and publicly disclosed.

As a boater in San Francisco Bay, I (and many others) rely on accurate GPS signals for safe navigation in reduced visibility (fog).

As you consider the conditional approval for LightSquared, I write to ask you to preserve the integrity of the nation's GPS system.

Last year, the federal government shut down the Loran navigation system, making recreational mariners solely reliant on GPS for all electronic navigation needs. Like so many other GPS users around the country, GPS is now integrated into our daily outings, and we look to the FCC to protect the integrity of the GPS signal.

Dear Federal Communications Commission:

As you consider the conditional approval for LightSquared, I write to ask you to preserve the integrity of the nation's GPS system.

Last year, the federal government shut down the Loran navigation system, making recreational mariners solely reliant on GPS for all electronic navigation needs. Like so many other GPS users around the country, GPS is now integrated into our daily outings, and we look to the FCC to protect the integrity of the GPS signal. I have invested approximately \$20,000 in a Lake Erie fishing boat that we use for recreation. This includes a \$1500 Lowrance GPS fish locator. If we were to lose the GPS capability we would be endangering our lives to venture onto Lake Erie or any of the other Great Lakes. Additionally, I use a handheld GPS for hiking and deer hunting. I do not like to get lost and the GPS helps me return home safely. Please don't vote to take away our GPS system.

Sincerely,

Dennis Towne

Like so many other GPS users around the country, GPS is now integrated into our daily outings, and we look to the FCC to protect the integrity of the GPS signal.

As a Great Lakes Sailor, I have found the GPS system to be an absolute must doing heavy fog. Foggy conditions occur very often on the Great Lakes and I have used the GPS system to get myself to safety. I also like it as a back up to my regular, "paper and pencil" navigation.

Please do not interfere or compromise this system.

Thank-you, Christopher and Cheryl LaRocque

Sincerely,

Christopher LaRocque

Washington, DC 20554

Dear Federal Communications Commission:

As you consider the conditional approval for LightSquared, I write to ask you to preserve the integrity of the nation's GPS system.

Last year, the federal government shut down the Loran navigation system, making recreational mariners solely reliant on GPS for all electronic navigation needs. Like so many other GPS users around the country, GPS is now integrated into our daily outings, and we look to the FCC to protect the integrity of the GPS signal.

Sincerely,

James Williams
